CDMX, MEXICO.

Im a Front-End Developer trained as a Web Designer. Experience working on NodeJS, React, Redux, SQL, among other technologies in the sector. With creative thinking for problem solving. Im very curious about digital transformation such as data science and artificial intelligence applied to financial markets. Always willing to learn about new technologies, specially when it comes to programming and data visualization.

I consider myself analytical and methodical, especially when it comes to my studies and internships. Detail oriented. Responsible and highly adaptable collaborator, with great commitment to organization and teamwork. Good communication skills in both languages.

Education
